## GOOD DAWG

**Superior Bio-Enzymatic  
Deodorizing Cleaner &  
Destainer for Kennels and  
Animal Holding Facilities**

### Why it's better

- Pleasant fragrance immediately reduces noticeable odor.
- An odor counteractant binds existing odor molecules.
- Uses specific bacteria and enzymes to degrade odor producing organic matter .
- Uses specific bacteria and urease to degrade urea and uric acid.
- Uses a triple surfactant package to ensure cleaning.
- Works to destain problem areas.
- Multiple chelators inhibit the formation of uric acid salts.

### How it cleans

Apply an 8 oz. per gallon of water solution for spot treatment or throughout the day. Allow to air dry up to 4 hours.

Use an 8 oz. per gallon of water solution (allow to dry up to 4 hours) prior to the use of a detergent/disinfectant to help remove stains and allow organic debris to be more easily treated.

Can be used after disinfection to provide long lasting odor control.

*GOOD DAWG combines fragrance, chemical counteractants, and bacterial enzymes for a three pronged attack on odor problems. Also contains super surfactants for superior cleaning and destaining.*

### Where it cleans

- Cages
- Runs
- Floors
- Drains
- Bathrooms
- Concrete, plastic, rubber, metals, tile
- Any area of animal waste accumulation
- Any area in need of odor control

### Technical Data

Appearance.....Turbid Liquid  
 Color.....Light Brown  
 Odor.....Mandarin Orange  
 Density.....8.4 lbs./gal.  
 pH.....6.5-8.8  
 Content.....Bacillus spore blend  
 Bacterial Count.....2.55e + 11 cfu/gal.
